### 3.16 Emergency Procedure for the PHENIX Detector Building 1008 Complex

### 1. Purpose

The purpose of this document is to define the Local Emergency Plan (LEP) for the operation of the PHENIX detector system. This local emergency plan will help to ensure:

- The safety of personnel.
- Implementation of the appropriate emergency procedures contained in <u>C-A-OPM</u> 3.0 and Section 5 of this document.
- Prompt notification of appropriate personnel.
- Maintenance of appropriate emergency status.
- Protection of the environment.
- Preservation of BNL facilities and equipment.

### 2. Responsibilities

- 2.1 <u>Local Emergency Coordinator (LEC)</u> During the testing, commissioning, and operation of the PHENIX detector system, the Local Emergency Coordinator (LEC) will be the C-A Collider-Accelerator Support (CAS) Watch. The responsibilities of the LEC are described in <u>C-A-OPM 3.2.</u>
  - 2.1.1 The LEC is responsible for being aware of the Shift Leader responsibilities described in Section 2.2.
- 2.2 The Shift Leader or designee, or the Building Manager shall be responsible for:
  - 2.2.1 Acting as a First Responder to incidents, and responding to the Command Post.
  - 2.2.2 Assisting the LEC in maintaining the PHENIX detector and facility in a safe condition.
  - 2.2.3 Ensuring that personnel involved in PHENIX operations are trained in all emergency and safety procedures.
  - 2.2.4 Ensuring that all postings of special instructions are complete.

- 2.2.5 Implementing all emergency responses outlined in the Procedures section of this document, or any additional instructions given by the Department Emergency Coordinator (DEC), LEC, or Incident Commander.
- 2.2.6 Assist in assuring that the persons performing safety checks on gas system are familiar with the appropriate procedure and the C-A Local Emergency Plan.

## 3. <u>Prerequisites</u>

The Shift Leader shall have training in the following:

- 3.1 C-A Local Emergency Plan, <u>C-A-OPM 3.0</u>, including familiarity with <u>SBMS</u> Emergency Preparedness.
- 3.2 All relevant equipment involved in the PHENIX detector system being used to ensure safe operations.
- 3.3 Knowledge of the physical layout of the 1008 complex (routes of egress, location of emergency equipment, telephones, controls, etc.)
- 3.4 Knowledge of the Building Assembly Area (COUNTING HOUSE) and outside assembly area (OUTSIDE of the COUNTING HOUSE).

### 4. Precautions

4.1 The safety of personnel and the environment is of primary importance. In an emergency, all personnel shall take great care not to give instructions or information, which may place personnel or the environment at risk or harm.

### 5. Procedures

- 5.1 In the event that a fire alarm goes off in the 1008 complex, all personnel should evacuate to the assembly point (OUTSIDE COUNTING HOUSE), and await the arrival of the Fire/Rescue Group.
  - 5.1.1 If it is not immediately clear there is an actual fire:
    - 5.1.1.1 The Shift Leader, or designee shall look for confirmation using the remote camera. Then, trip the emergency POWER OFF button in the Control Room. This shuts down the power and places the gas system in a safe state. Pull the nearest fire alarm box if not already sounding, then call 2222 or 911.

- 5.2 If more than one fire alarm goes off or in the event that there is an actual fire in the 1008 complex, evacuate all personnel to the assembly point and await the arrival of the Fire/Rescue Group.
  - 5.2.1 Trip the emergency POWER OFF button to shut down power.
  - 5.2.2 Pull the nearest fire alarm box if the alarm is not already sounding, then call 2222 or 911.
  - 5.2.3 Designate a person to notify the gas system experts on call and inform them that an emergency has occurred. The LEC and Shift Leader should not leave the area without approval of the Incident Commander.
  - 5.2.4 The LEC and Shift Leader shall report to the Command Post upon arrival of the Fire/Rescue Captain. The Command Post shall be vehicle designated Car-1 unless directed elsewhere by the F/R Captain.

### 6. <u>Documentation</u>

None.
